PROJECT MANAGEMENT

**DATE:** January 13, 2012

**TO:** Guy F. Rezendes, P.E., Utilities/Railroad Engineer  
MassDOT  
10 Park Plaza – Room 6340  
Boston, MA 02116-3973

**FROM:** John M. Leskow, NSTAR Project Engineer (Gas)

**SUBJECT:** Project File No. 604531 – Assabet River Rail Trail in Acton/Maynard

I received the 25% Design submission for the project mentioned above. Please be aware the NSTAR Gas Service Territory along the project route ends at the Maynard/Acton Town Line. Therefore be sure to include National Grid in your Letter of Transmittal since they cover Acton.

I am the contact person assigned to this project. I reviewed the depiction of the gas facilities on the 25% design submission for accuracy and see no errors that need to be corrected. NSTAR Gas has no conflicts, proposed relocations or anticipated expansions that need to be coordinated with this project schedule.

Please keep me informed of any utility review on-site meetings and additional design submissions.

Sincerely,

*John M. Leskow*
